Out of the 54 ponds on site at Tara, currently only 7 require attention for growth outside of normal maintenance. No ponds require attention within 48 hours. Mostly shoreline weeds are the focus this month, but other targets include Hydrilla, Chara, and Planktonic algae.

Ponds Requiring Attention within 48 Hours:
NONE

Ponds Requiring Attention within 7 Days:
Pond #2 - Shoreline Weeds
Pond #3 - Shoreline Weeds
Pond #11 - Submersed Vegetation
Pond #13 - Shoreline Weeds
Pond #18 - Hydrilla
Pond #22 - Shoreline Weeds
Pond #26 - Planktonic Algae

Pond #46 was filled in with soil and sodded since the last inspection. ASI is working to delete this pond off of regular maintenance and are evaluating the contract cost. A letter of addendum to the contract will be sent once processed.

A Sandhill Crane nest was observed on Pond #50 during this month's inspection. By law, it is illegal for our technicians to treat any vegetation or spray any chemical within certain distance of the nest, as the species is protected. Any activities that cause the bird to come off it's nest is a federal offense.

Wildlife observed during this inspection include Tricolored Herons, Snowy Egret, fish, White Ibis, Great Egret, Anhinga, Limpkin, Glossy Ibis, alligator, turtles, Sandhill Cranes, Little Blue Herons, Mallard Ducks, Great Blue Heron, Moorhens and Merganser Ducks.
