Ms. Hartman stated that the next item on the agenda was the consideration of the Operation and Maintenance expenditures for August 2006. Ms. Hartman asked if there were any questions. There was a question in regards to the invoice for Lombardo, Skipper & Foley, and the reason why the bill is so expensive. Ms. Hartman stated that in her experience, the District Engineering firms do have a high cost rate, and that the invoice was for the meeting that the Board had with the District Engineer. There was another question in regards to an example of a potential situation.

It was asked, if the Board or District staff called and complained to the appointed representative, Bob Lombardo, and he sends out a representative from the Engineering firm come out and assess a problem with the engineering of the lakes and the water flow, would the District be billed separately for that representative. Ms. Hartman and Mr. Vericker stated yes, it would be an additional cost. It was stated that there was a representative that was sent out by the request of Ms. Hartman to investigate the water flow on Wingspan Way and Birdseye Terrace. Ms. Hartman clarified that unless the District can prove that it was an Engineering flaw, the District will be billed for that visit. It was stated that Bob Thomas who works with Mr. Agnelli, informed to the Board member that they had previously re-jiggered the engineering behind the pond behind the homes on Birdseye Terrace, which resulted in the water backing up out of the lake. It was stated that all water should flow out south and west out of that area. Ms. Hartman stated that this has been an ongoing issue. It was stated that the Engineer that did the investigation, informed the Board member that the lake was built eight inches too high. Mr. Vericker asked if it was designed to be built eight inches too high, or if it was built eight inches higher than designed. It was stated that the Developer built the District and handed it over "as is". It was stated that the Developer had previously sent in his crew to correct the existing problem, although, the problem is currently still not corrected.

There was a question in regards to the invoice for Vanasse Hangen & Brustlin, Inc. in regards to it possibly being paid 90 days prior. He stated that there are a few areas that the golf course was mowing and have since stopped, so TLS is now doing them. Mr. Shullman stated that there is a tree down on Tara Boulevard that the residents are concerned about because it is leaning, he stated that the tree cannot be straightened as it has been growing like that for too long. He stated that the roots of the tree could be damaged or the tree could possibly die if he were to try and straighten it. Mr. Shullman stated that they did straighten a tree that had fallen over in another area. He stated that the palm tree that is down could have been struck by lightning. The irrigation pump that is near it was reinstalled a few months prior. It was stated that there was a problem with the irrigation in another area with the sprinkler, Mr. Shullman stated that there will be someone out to take a look at it.

There was a question in regards to the areas that the golf course has stopped mowing, and who is responsible for maintaining those areas. Ms. Hartman stated that she had been in contact with Mr. Agnelli, he informed her that all questions regarding the landscaping responsibilities should be directed to Don Johnson who has a master map of the District and who should be mowing the areas. Mr. Shullman stated that he would coordinate with Mr. Johnson to clarify which areas TLS is responsible for mowing. A brief discussion ensued. It was stated that the District owns the lakes and therefore, the golf course should not be mowing around that area anymore.
